Société commerciale rentable spécialisée dans le crédit carbone

A vendre une entreprise anglaise rentable spécialisée dans les crédits carbone. Un crédit carbone est un certificat ou un permis négociable représentant le droit d'émettre une quantité déterminée de dioxyde de carbone ou la quantité équivalente d'un autre gaz à effet de serre (tCO2e).

Les crédits de carbone et les marchés du carbone font partie des tentatives nationales et internationales visant à atténuer la croissance des concentrations de gaz à effet de serre (GES). Un crédit carbone équivaut à une tonne de dioxyde de carbone ou, sur certains marchés, à des gaz équivalents au dioxyde de carbone. L'échange de carbone est une application d'une approche d'échange d'émissions. Les émissions de gaz à effet de serre sont plafonnées, puis les marchés sont utilisés pour répartir les émissions entre le groupe de sources réglementées.

Il existe deux types de crédits. La réduction volontaire des émissions (VER) est une compensation carbone qui est échangée sur le marché de gré à gré ou volontaire contre des crédits. La réduction certifiée des émissions (CER) repose sur des unités d'émission (ou crédits) créées par le biais d'un cadre réglementaire dans le but de compenser les émissions d'un projet.
